

### About Ridge Clean Energy

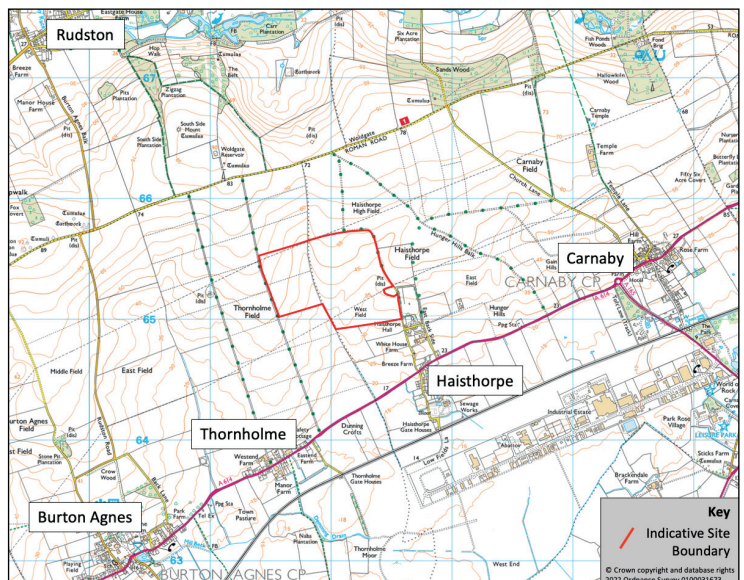

Working in partnership with land owners and local communities, **Ridge Clean Energy's** team identifies and develops new projects to supply clean energy to homes, businesses, and other power consumers. The RCE team have a wealth of experience with community engagement support and have created a range of local initiatives in small towns and villages that focus on improving community value.

#### Key Facts

- The scheme would generate as much electricity as is used by **8,900 homes** annually.
- Site area of approximately **65 ha/161 acres**.
- Solar capacity of up to **39 MW**.
- Battery storage capacity of up to **78 MWh**.
- **40 year** operational period.
- Approximately **6-9 month** construction period.
- Fully decommissioned after operational period.
- Funding will be made available **to nearby households to reduce electricity bills** and to the local community to help support local community projects and ideas.
- Renewable electricity generation from the proposed development would support the UK's legally binding net zero commitment.

### About the Project

Ridge Clean Energy is proposing the **Three Oaks Renewable Energy Park**, which is located between Thornholme and Haisthorpe in the East Riding of Yorkshire. The project includes an array of ground-mounted solar and ancillary infrastructure. In addition, a Battery Energy Storage System (BESS) would be included within the project.

Three Oaks Renewable Energy Park Site Map

The project could deliver up to 39 MW of renewable electricity, which would generate as much electricity each year as is used by approximately 8,900 homes (based on average domestic consumption per household of 3,900kWh – DBEIS, 2020). The environmental survey work has commenced and will be ongoing through the first part of this year.

The project would deliver a net gain in biodiversity, for example, by including a species-rich seed mix in between the rows of solar panels to encourage invertebrates and birds.

As an industry-leading developer, we engage with local communities and councils at an early stage. Specifically, we are keen to identify local initiatives for which our expertise and seed capital may be useful. We want to support existing community projects and help new, local ideas become a reality.

## You are invited to our Public Exhibition

Newsletter February 2022

### **Public Exhibition: Three Oaks Renewable Energy Park**

You are invited to our Public Exhibition to learn more about the proposed Three Oaks Renewable Energy Park. Join us to review our ideas for a solar array and battery storage on land to the north of the A614 between Thornholme and Haisthorpe.

The first exhibition will be held Tuesday, 15<sup>th</sup> February, 2pm until 8pm:

- Ferns Farm Hotel, 29 Main Street, Carnaby

The second exhibition will be held Wednesday, 16<sup>th</sup> February, 10am until 6pm:

- Burton Agnes Sports Club, Rudston Road, Burton Agnes

Refreshments are provided.
